GLÜHWEIN™
PRODUCT CATALOG

The warm bosom of your mother

The bosom of your father who held your hand

The bosom of your friend who taps you on the shoulder

The bosom where you can rest comfortably after returning home

We always miss the bosom.

The bosom is love, comfort, and relief.

The warmest bosom in the world, Created by GLÜHWEIN.

by GLÜHWEIN

Trustworthy technology

GLÜHWEIN electric blanket using patented electromagnetic wave blocking hot wire is a product that has received various certifications in addition to EMF (electromagnetic field environmental certification) which is tested/supervised by a government institution.

Since it does not emit electromagnetic waves, you can rest assured when using it. It also boasts durability with significantly low malfunction or defect rate due to its special manufacturing method. Even today, GLÜHWEIN delivers a trustworthy technology so that you can enjoy a warmer and safer life.

Technology of sharing

GLÜHWEIN looks around our surrounding to create a warmer society. We will become a company that can lend a helping hand and speak warm words to people who need help or warmth. GLÜHWEIN communicates a technology of sharing making the society more beautiful.

Elegant Technology

As colors and patterns is connected to a person's lifestyle, design changes our life. GLÜHWEIN is exerting effort and passion for a newer and more beautiful design, and cultivate the life of mankind with creativity no one can imitate.

Heart-warming technology

GLÜHWEIN is always together in our life. As a friend who holds my hand, and good people like a precious family gathers to create a good society, we hope everybody feels warmth and love with out technology and beauty. GLÜHWEIN creates the most heart-warming technology in the world.

GLÜHWEIN FOR CAMPING & OUTDOOR

Outdoor must have Items

Essentials for camping GLÜHWEIN Electromagnetic wave blocking electric blanket.

Product optimized for camping

This electric blanket is small in volume and weight, and the configuration of the safety storage bag makes storage and movement of the product safe and convenient with low power consumption. Hence, this product is suitable for camping.

It is a product that lets you enjoy camping with your precious family by using patented electromagnetic waves blocking hot wires.

Washable product

The GLÜHWEIN electric blankets are safe from germs by adding antibacterial treatment to the cotton-based fabric and are washable. Hence, it can be used cleanly.

Various sizes and patterns suitable for emotional camping.

Various sizes from single to double and mini offer a wide range of choices and the design that goes well with emotional camping makes camping more enjoyable.

GLÜHWEIN FOR MOM

Like a warm and cozy mother's bosom!

Essential item for pregnancy and child care GLÜHWEIN Electromagnetic wave blocking electric blanket

This product can be used by pregnant women with confidence

The GLÜHWEIN electric blanket uses patented electromagnetic wave blocking hot wire and has obtained multiple certifications including EMF (Electromagnetic Field Environment Certification) that is tested and supervised by the national certification authority. Hence, pregnant women and infants can use this product without any concern about electromagnetic waves.

6-fold safety system and smart timer makes this product safe to use

This product is designed with six-fold safety device with smart timer that automatically turns off power in case of overheating

This product is economic for prospective mothers who are burdened with heating expenses

This product is economical due to reduced power consumption, with significantly less malfunction or defect thanks to special manufacturing methods. Hence, you can use it without worrying.

Unrivaed technology just for GLÜHWEIN

It is a product that has received EMF certification by using GLÜHWEIN's d electromagnetic wave blocking hot wire. This is a safe product you can use without concern for electromagnetic waves.

What is EMF?

(Electromagnetic field environmental certification)

It is a system certifying that a product is suitable by going through a fair screening process according to strict standards on a company testing, producing, and manufacturing electric products generating electromagnetic waves. It is being carried out by the Korea Testing Certification (KTC). EMF certification determines whether a product is safe or not by measuring magnetic field in mG(milligaues), and regards a product with electromagnet value below 10V/m and magnetic field value below 2mG as safe.

Heating line
electromagnetic waves
electromagnetic waves blocking
Sheath

GLÜHWEIN, patented electromagnetic wave blocking hot wire.

GEBS is an acronym of GLÜHWEIN Electromagnetic Blocking System, and is GLÜHWEIN's unique electromagnetic wave blocking system that has received EMF certification. It is GLÜHWEIN's technology used for making safe products without concern for electromagnetic waves, and helps the safety and well-being of customers using the product.

Left and right separated heating system

GLÜHWEIN left and right separated heating electric blanket can provide heat on the left side and right side separately.

Function for automatically cutting off power after 15 hours

GSS is GLÜHWEIN's safety system in which power is automatically cut off after 15 hours of operation.

Power-saving design

It is a smart product that has significantly reduced electric consumption throughout the day by applying new technology that allows the product to be used economically without concern for electrical bills.

Smart Timer Function

If the desired time of use is preset between 1 to 12 hours, it is convenient since it automatically turns off at the set time.

AI SYSTEM

The patented human body sensing heating system is a state-of-the-art technology in which a sensor detects the minute movement of the body when a person is sleeping and automatically turns on or turns off the heating.

6 layered Safety System

It will become the guardian of a safe life by preventing overvoltage and automatically cutting off power when overheating through adopting 6 layered safety system (6SS).

Washable

Since it is produced in compression method where hot wire and cotton is fixed, it is washable in water, and even after washing, the hot wire and cotton does not become rumpled. So you can rest assured and use it.

Multi-Safety Storage Bag

GLÜHWEIN electric blanket has a multi-safety storage bag that helps store the blanket safely and conveniently by rolling it up so that the hot wire does not bend or excessive force is applied to the product.

GLÜHWEIN's unique technology 01

Left and right separation heating system

If the temperature of your sleep is different, choose GLÜHWEIN.

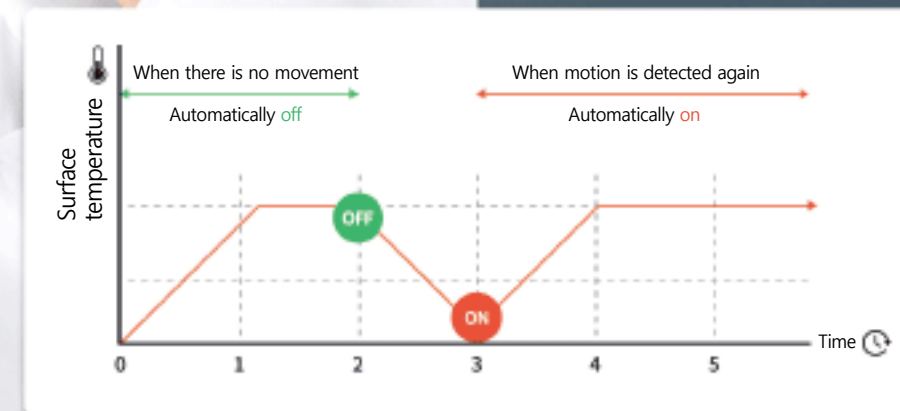

The GLÜHWEIN left and right separation heating system can be separated from left and right, so when using two people, the temperature can be set at a temperature that suits each person can use it conveniently.

Power supply in case of human presence

Power shutdown if no one is present

GLÜHWEIN's unique technology 02

Human body sensing heating system

It's a smart way to keep your sleep temperature.

When you sleep, the sensor detects the minute movement of the human body. It is a state-of-the-art technology that automatically turns heating on and off. If there is no movement for 2 hours, the power supply will be automatically cut off and if the movement is detected again, the power will be automatically supplied, saving energy and preventing fire, making the customer feel comfortable and comfortable.

GLÜHWEIN's unique technology 03

Automatic power shutoff in case of overheating

Use more safely with GLÜHWEIN's 6-fold safety system (6SS)!

The six-fold safety system (6SS) of GLÜHWEIN provides the function to turn off the power automatically in case of overheating or abnormality of the hot wire by precise temperature control function of current fuse, SCR, and IC circuits.

The GLÜHWEIN electric blanket will become the protector of a warm and safe life through the six-fold safety system (6SS).

GLÜHWEIN constantly conducts researches to enhance the safety of products.

GLÜHWEIN's unique technology 04

Automatic power shutoff after 15 hours.

Even if you go out without turning off the power, GLÜHWEIN 's smart GSS (GLÜHWEIN SAFETY SYSTEM) will automatically shut down the power after 15 hours. You can rest assured and use it.

What is GSS?

GSS is GLÜHWEIN SAFETY SYSTEM, meaning GLÜHWEIN's safety system researched and developed for product safety.

After 15 hours, the power will be automatically cut off, adding safety and convenience for our customers.

GLÜHWEIN's unique technology 05

Power saving type design without any worry of electricity bills

Feel free to use the product with economic electricity bill of super-saving type!

GLÜHWEIN electric blanket uses a new technology to reduce power consumption

GLÜHWEIN's unique technology 06

GLÜHWEIN's unique engineering method

Washable

**GLÜHWEIN's unique technology and waterproof heating wire provides
convenience as a washable blanket!**

GLÜHWEIN electric blanket is produced by a compression method that fixes
hot wire and cotton together,
Hence, the blanket can be washed with water, and there is no case of hot
wire and cotton scattering.

GLÜHWEIN's unique technology 07

Setting use time reservation Smart Timer Function

Set the time you desire and use conveniently!

With GLÜHWEIN's safety-designed thermostat, you can reserve 1 to 12 hours
of use as you desire.

At the set time, power is automatically turned off, so it can be used
conveniently and safely.

※ Please refer to the product specification table as the maximum setting time varies by each
product.

GLÜHWEIN's unique technology 08

Multi-safety storage bag for safe storage

Store safely at home or when camping!

If you keep this blanket in the safety storage bag, you can roll it without
folding and store it inside the bag.

Since the hot wire is not bent, the product receives less pressure, and hence,
it can be stored safely.

Safe GLÜHWEIN verified by patents.

GLÜHWEIN is striving to enhance the safety performance and quality of the product through constant research and development.

Electromagnetic insulating hot wire patent

Technology perfected with constant effort by craftsman for 5 decades.

GLÜHWEIN has been striving to enhance the quality of the product based on technology accumulated for 50 years. We obtained patents and various certifications as our technology and design in electromagnetic shielding hot wire, washable technique and 6-fold safety device (6SS), etc. were recognized.

GLÜHWEIN FREEVOLT

In line with the trend in the global era, GLÜHWEIN presents a culture of smart relaxation so that you can feel the warm bosom of GLÜHWEIN by applying design of ultra-small and ultra-light products and automatic voltage transformation system to products.

ELECTRIC FREEVOLT BLANKET

Why GLÜHWEIN?

- Smart adjuster automatically changes the voltage according to the environment of the relevant country without a transformer so that the product can be used in most countries.
- GLÜHWEIN products are light and small, and hence, are easy to carry and store.
- The product has been safely designed with special manufacturing methods and can be used in both Korea and abroad.
- This product can be used without concern of after-sales service due to considerably low malfunction or defect rate.
- Antibacterial treated cotton fabric enables protection from bacteria, and this material can be washed with water.

FREE VOLT

GK FV-201 | GK FV-202 / 203

GLÜHWEIN free volt electric blanket is not only small in volume but also light in weight, but also suitable for use in most countries including not only Korea, but also in the United States, Canada, Japan, China, Britain, France, Germany, Australia, Spain, Taiwan, Mexico, New Zealand, Czech Republic, and Vietnam without any transformer since the voltage is automatically adjusted to the country's standard by smart adjuster.

GLÜHWEIN's technology

From researching new materials to developing technologies for safety and convenience in use, even a single product is instilled with the passion and technology of GLÜHWEIN.

Use of new material, soft-sponge

The cushion and volume feels good and the hot line is not felt, and there is less wrinkle of the product since it uses new material.

Two-Bimetallic Safety Design

2 bimetals are built into the product to prevent overvoltage and to shut off power upon overheating. Thus, this product can be used safely.

Multistage temperature control

From mild to warm, the temperature can be set to suit the taste of an individual, and this product is easy to use.

Electromagnetic interference test passed and electrical safety certified product

This product has passed Electromagnetic interference test and obtained electrical safety certification. Hence, the product can be used safely and healthily.

Multi-purpose multi-use available

GLÜHWEIN's multi-blanket can be used in confined spaces for use such as sitting cushion, sleeping, steam bath, camping, etc. with easy storage and carriage.

For sitting cushions

For bed use

For steam bath

For camping

Multi-safety storage bag for safe storage

Not only while camping but also at home, you can keep the product in a safe storage bag, without the cotton product folded but rolled up. This method of storage avoids the hot wire from being folded. So the product receives less pressure, and hence, can be stored safely and conveniently.

PURE COTTON COVER

This is 100% pure cotton cover with zippers on both sides, which makes it easy to remove electrical blanket and wash.
The electric blanket cover has lining fabrics used to minimize slip between the electric blanket and the cover.

Material _ Cotton 100% | Single 180 × 100 cm | Double 180 × 135 cm

Pure cotton cover

Convenient zipper-separable cover

This cover is a zipper-separated pure cotton cover that can be used with electrical blanket in a clean and convenient way. If the cover gets dirty, you can take it off and wash it in the washing machine. GLÜHWEIN's pure cotton cover has 2 zippers. So the electric blanket cover is easily separated.

100% pure cotton fabric and anti-slip fabric is used

100% pure cotton fabrics with less skin irritation are used. And slippage between the electric blanket and the cover is minimized by using the anti-slip fabrics.

GLÜHWEIN's unique sensual design

We have instilled GLÜHWEIN's unique and diverse design with simple colors and patterns.

Neat round finish

GLÜHWEIN enhanced the design and quality by solid back stitch and neat rounded finish to the edges of the product.

Material _ Microfibre | Voltage _ 220V | Power consumption _ 20W / 35W / 50W | S 45 × 45 cm / M 45 × 90 cm / L 45 × 135 cm

ELECTRIC HEATING PAD

This is an electric seating cushion that prevents over-voltage by two bi-metal safety design with separable temperature controller.

Microfibre with a soft and dense tissue enhances warmth retention.

Its feature is that it can be used conveniently for various purposes.

ELECTRIC HEATING PAD

GLÜHWEIN's technology

From research on new economic technologies that reduce power consumption to development of technologies for safety and convenient use, even a single product is instilled with the passion and technology of GLÜHWEIN.

Economic electricity charges of super power-saving type
GLÜHWEIN uses a new technology to reduce power consumption. With about 700 won per month based on product use for eight hours a day, you can use it economically without worrying about electric bills.

Two-Bimetallic Safety Design
The product can be used safely since the power is automatically turned off to prevent overvoltage and overheating with 2 bimetals built in.

Conveniently Separated Temperature Controller
The temperature controller can be separated from the cushion. Thus, it is easy to use and the temperature can be set according to the customer's personal preference.

Product that has passed electromagnetic interference test and obtained electrical safety certification
The product passed Electromagnetic interference test and obtained electrical safety certification. Thus, customers can use the product safely and healthily.

Safely sterilized high quality microfiber fabric

GLÜHWEIN electric blanket adds antibacterial treatment to the microfiber fabric to make it safe from bacteria during use. By using a high-quality microfibre that does not shed its fur, the fabric feels soft and warm.

Use of band that can fixed to a chair

Customers can fix the seating to a chair using a band that can be fastened to the back of the sitting cushion. (applicable to M sized cushion). Solid back stitching and neat round finish to the edge of the product enhanced the design and quality of the product in addition to the GLÜHWEIN's unique, simple and elegant design.

Band for fixation to the chair (M sized cushion)

Solid back stitch and neat round finish

HEATING TENT

This is a tent made out of high-grade cotton material that prevents loss of internal warmth. If you use this tent with an electrical blanket, you can experience a totally different warmth due to the effect of raising the temperature of a space.

compliance with ROHS Standards

HEATING TENT

Groundbreaking Reduction of Heating Cost

When using electric blanket with heating tent, customers can save 30,000 to 50,000 won per month based on City gas bill. If the electric blanket and heating tent are used together, the temperature of the sleeping space may be raised by 4 to 9°C. Hence, even if you turn off the boiler before going to bed, the temperature of 22~24°C suitable for sleeping can be maintained throughout the sleeping hours.

Results of setting the temperature of indoor space at 12°C and measuring the internal and external temperature only when using electric blanket

Production with purely domestic technology

From the development of eco-friendly aluminum poles to the production process, the product was produced with purely domestic technology.

Reliable CVC (Chief Value Cotton) fabric
100% made in Korea! 67% cotton + 33% polyester

CVC stands for "Chief Value Cotton" and refers to a blended yarn fabric made of cotton as its main material.

While cotton has good warmth and ventilation, it gets wrinkled easily and shrinks when washing. The fabric that supplemented these disadvantages is cotton blend. Furthermore, the fabric that has designed the optimum warmth and ventilation by increasing the ratio of cotton is GLÜHWEIN fabric. GLÜHWEIN fabric provides a cozy feel with a soft touch and has appropriate air permeability for a comfortable life as a breathing fabric.

Cotton (100%) - CVC (more than 50% cotton) - T/C (more than 50% Poly)

Safe domestically produced aluminum poles used
The heating tent pole introduced eco-friendly eco magnesium technique in the process of film treatment to reduce emission of carbon dioxide, which is the main culprit of greenhouse gases.
A more stylish color was created through matte coating treatment optimized for indoors

In the aluminum pole, the rubber string connects the poles with each other like a magnet, supporting the poles to perform the contemplated function like a human ligament. Thus, the life of the string can be said to be the life of the pole. GLÜHWEIN aluminum poles have been properly manufactured even in parts which are not visible. Poles are available for free maintenance service for 5 years and are available for separate purchase after the initial purchase. In case of existing customers, they can purchase only skin. First-time customers shall purchase a skin and a pole.

Washable and usable in all seasons

This product can be used in all seasons; Warm heating tents in winter; cool mosquito nets in summer (separately purchased); and picnic tents in spring and fall. And this product is easily washed with a washing machine. Hence, any dirt such as foreign substances stained in the course of daily use can be cleaned easily and quickly.

From cutting to sewing, the hand touch by 30-year veteran craftsman

- 01 **Double zipper** : Enhancing air permeability by freely adjusting the gap between the doors.
- 02 **Top knot** : The pole can be fixed with a ribbon on the ceiling.
- 03 **Webbing hanger** : Nylon weaving hanger that holds the pole gently.
- 04 **Wooden rings** : the ring that fixes the door as nicely as a door curtain.
- 05 **High-Density PP pole jib** : Prevents floor scratch by safely wrapping the pole.
- 06 **Cupboard mesh bag** : Controls the smell and humidity inside the tent by raising the air freshener or wet towel, etc.
- 07 **Nickel-plated gold ring** : The ring at the center of the ceiling for hanging lights.

Safe and good-quality GLÜHWEIN electric blanket used in many countries around the world

Reliable GLÜHWEIN in win-win relationship with various domestic customers

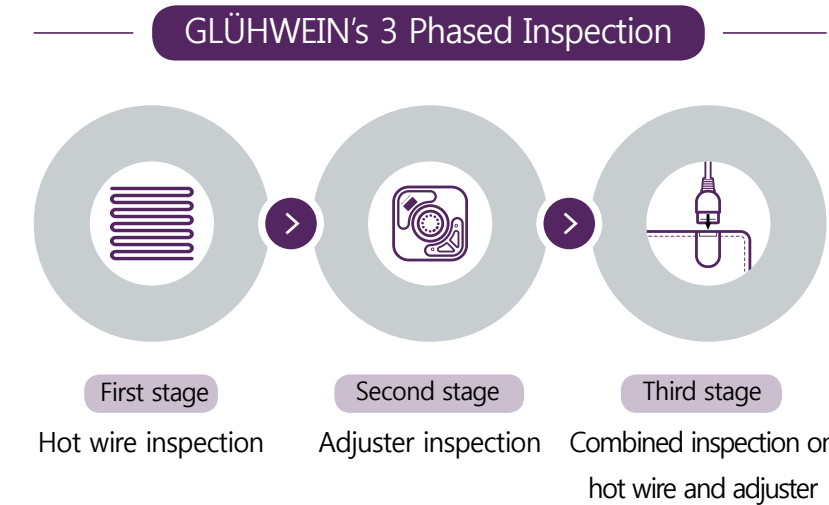

Safe and good-quality GLÜHWEIN electric blanket used in many countries around the world

GLÜHWEIN's passion Ceaseless R&D

GLÜHWEIN is working hard to engage in constant research and development to enhance safety and quality.

GLÜHWEIN product is released through a thorough three-step inspection and hence, it is safe and its defect rate is low.

GLÜHWEIN shares a warm bosom with neighbors.

GLÜHWEIN delivers a warm bosom to the alienated classes in hardship.

From the profits earned from the GLÜHWEIN products you are purchasing; we are supporting a warm bed to the poor.

GLÜHWEIN makes the beautiful world together.

Sponsoring those who are shunned in the lowest places of the local community,
That is the matter we as an enterprise are mostly attending to.
We support self-reliance of families in crisis with the Korean Red Cross.

GLÜHWEIN make the story that is warmer than warmth.

GLÜHWEIN, the warmest bosom in the world.

GLÜHWEIN™
